## AppleWorks 1.1: Indentation Problems On A Scribe Printer (9/95)

Article Created: 4 May 1985

Article Reviewed/Updated: 19 September 1995

TOPIC -----

When I print from AppleWorks 1.1 to my Scribe printer the second paragraph always prints with the wrong indentation. Why does this happen?

DISCUSSION -----

When you print an AppleWorks 1.1 file using the Scribeprinter, the first paragraph always prints with an indentation of 5 spaces, as it should. If, however, the second paragraph prints without the proper indentation, check to see whether justification is set to FULL JUSTIFY. If not, set the justification to FULL JUSTIFY and then try again. This problem has been corrected in later versions of AppleWorks.
