GS/OS 5.0 AppleShare Access Over Network Bridge

This article last reviewed: 8 August 1989

TOPIC -----

Does GS/OS 5.0 allow access to an AppleShare File Server through a bridge on the network?

DISCUSSION -----

GS/OS 5.0 does provide network file services to an AppleShare File Server over bridges. This feature works like the Apple IIGS System Disk 3.1 or 3.2.

However, GS/OS 5.0 has the same limitations for network startup that exist with System Disk 3.1 or 3.2: network startup must take place within the physical network -- not across a bridge.
