## Apple IIGS Errors: Toolset numbers

Generally, error numbers are a hybrid of the toolset number and a specific error within that toolset: the first byte is the tool number and the 2nd byte, the error number.

For example, error \$110B is an error that occurred within the Segment Loader (\$11 in decimal is 17). Specifically, error \$110B is a 'Load Segment is Foreign' error, which can occur from the Initial Load (function \$07) or Load Segment by Number (function \$09) calls.

Here, you can at least identify in which Toolset an error occurred with this list of current Tool Sets and their Toolset numbers (to be superceded by an APDA mailing).

- 1 - Tool Locator
- 2 - Memory Manager
- 3 - Miscellaneous Tools
- 4 - QuickDraw //
- 5 - Desk Manager
- 6 - Event Manager
- 7 - Scheduler
- 8 - Sound Manager
- 9 - Front Desk Bus Manager
- 10 - SANE
- 11 - Integer Math
- 12 - Text Tools
- 14 - Window Manger
- 15 - Menu Manager
- 16 - Control Manager
- 17 - System Loader
- 18 - High Level Printer Driver
- 19 - Low Level Printer Driver
- 20 - Line Edit
- 21 - Dialog manager
- 22 - Scrap Manager
- 23 - Standard File
- 24 - Disk utilites
- 25 - Note Synthesizer
- 26 - Note Sequencer
- 27 - Font Manager
