Applesoft: Tips on error handling

When using ONERR GOTO, you have two correct ways to leave your ONERR routine:

1. You can use RESUME; with this, Applesoft re-executes the statement that
   caused the error, or

2. you may use a GOTO after executing a CALL -3288. For details on this call
   and on error handling in general, please refer to pages 66 and 67 of the
   Applesoft BASIC Programmer's Reference Manual, Vol. 2 (p/n A2L4031).
