Applesoft BASIC: # Character in When Printing a Listings

This article last reviewed: 9/11/87

If, when you print out a program listing, you find unwanted "#" characters in front of the line numbers, see if you have issued the command "PR#1" in the program. You need to preface all ProDOS commands with a CHR\$(4), the Control-D character.

The correct Syntax for this command is:

```
PRINT CHR$(4); "PR#1"  
<None>
```

Keywords: <None>
