Space Quest: It is Incompatible with Old Apple IIGS ROMs

This article last reviewed: 11 January 1988

A software package called Space Quest, part of the Endless Disk Drive, can produce a Fatal System Error -> 0814 unless the following rules are observed:

- An Apple IIGS with serial number E704 or less needs to have both the VGC and ROM upgrades.

- An Apple IIGS with serial numbers E704 - E723 needs the ROM upgrade only.

- You must use System 2.0 or later. This means that Space Quest will not run with the old Apple IIGS ROMs (342-0077-A).
