Manzanita software: Using it on hard disks other than ProFile

To install The Advanced Business Accountant or BusinessWorks on a hard disk other than the Profile, the hard disk must be accessed before booting The Advanced Business Accountant Startup Diskette or the BusinessWorks BW.HARDDISK diskette. For example, if installing software on a Sider hard disk, boot the hard disk and select the ProDOS option and then select Basic. Insert the Startup diskette or BW.HARDDISK and enter PR#6 (or whatever slot the floppy disk drive is located in). Then follow the installation instructions provided.

Once the software has been installed it may be selected by entering -TAB A for The Advanced Business Accountant or -BW for BusinessWorks at the Basic prompt.
