## Backup II: Use ProDOS 1.2, Not ProDOS 1.4

This article last reviewed: 22 January 1988

There were numerous changes made from ProDOS 1.1.1 to 1.4, perhaps too many for Backup II. Backup II was never updated to take advantage of the latest version of ProDOS, which supports the Apple IIGS.

If you're using Backup II, we suggest you go back to ProDOS 1.2 instead of 1.4, to have fewer changes in the operating system. By not using ProDOS 1.4, all you'll be giving up is support for the Apple IIGS. ProDOS versions 1.3 and 1.2 work correctly on other systems, just not on the Apple IIGS.
