ProDOS 1.4 And Backup II 1.1 Incompatibility: Use ProDOS 1.1.1

This article last reviewed: 23 June 1988

ProDOS version 1.4 does not work properly with Backup II version 1.1 --
using them together results in "random errors". If you already have
Backup II v1.1, you can work around the problem by launching with a disk
configured for ProDOS 1.1.1.

This incompatibility has been solved in the current version of Backup II
(v1.1.1), which will function perfectly well with ProDOS 1.4, and which
also solves some other problems found in Backup II v1.1, such as failures
of the "restore" function.
