Apple Writer IIe: Converting DOS files to ProDOS

To convert Apple Writer IIe DOS files to ProDOS, first print your files to disk:

1. Insert your destination diskette into the drive.
2. Press "p" while holding down the Control key.
3. Type in PD8 Return.
4. Press control P again, then press NP to begin printing to your disk. Enter your file name when prompted. Don't forget to type the disk drive and slot number if necessary.

By the way: you type PD8 because there is no slot 8 in an Apple IIe. This alerts Apple Writer to print to a disk and ask you for a file name.

Now convert your file from DOS to ProDOS using the Apple IIc Utilities disk (part number 680-3234) or the CONVERT program on the the ProDOS User's disk (pn 680-0224).
