## AppleWriter II: Transferring Files to a PC

This article last reviewed: 19 February 1991

TOPIC -----

I want to transfer my ProDOS-based AppleWriter II files to WordStar 5.1 on my PC. Can AppleWriter II save files in an ASCII text format? If it does, can I use a standard communications package on my Apple IIe and PC and just run a cable between the two serial ports to transfer the data?

DISCUSSION -----

AppleWriter II saves files in ASCII format automatically. You can simply transfer your data to the PC using a serial cable and communications program.
