QuickFile III: String overflow error

When you try to save your file, QuickFile III prompts you for the date for
the catalog. If you type in eight or more characters, which is more than
QuickFile can convert to a valid date, the program stops with a String
Overflow error and loses all the data you just typed in.

To avoid this error, verify that the date you typed in is correct before
pressing RETURN. Examples of what QuickFile considers to be valid dates are
listed on page 41 of the QuickFile Manual.
