ProFile interface card for Apple III: Pinouts (10/94)

```
Article Created: 17 July 1985
Article Reviewed/Updated: 18 October 1994

TOPIC -----------------------------------------------------------

What are the pinouts for the Apple /// ProFile Interface Card?

DISCUSSION ------------------------------------------------------

The pinouts for the ProFile card are as follows:

        1    PHI              13   XD7
        2    GND              14   GND
        3    TRw              15   PSTRB (low = true)
        4    GND              16   BSY/INT (low = true)
        5    XD0              17   CMD (low = true)
        6    XD1              18   RPARITY (low = true)
        7    (not used)       19   GND
        8    XD2              20   GND
        9    GND              21   CRES (low = true)
       10    GND              22   XD3
       11    XD5              23   XD4
       12    XD6              24   GND
                             25   CDET (low = true)

The cable to the ProFile is pin-to-pin straight through.
