Apple Products: Use in Low-Level Acid Fumes Environment (2/97)

Article Created: 5 December 1988

Article Reviewed/Updated: 17 February 1997

TOPIC -----

This article discusses the use of Apple computers in an environment with small amounts of low-level acid fumes?

DISCUSSION -----

Apple does not recommend the use of our computers in ANY environment with potential to put the computers in contact with corrosive chemical fumes, such as hydrochloric acid.

Even small amounts of hydrochloric acid can cause major problems with electronic equipment.
