Business BASIC III: Swap

The Swap command exchanges the values of two variables of the same type;
however, there are several reserved variables, like HPos and VPos, that Swap
does not work with properly.

```
     10 Swap A%,B%                          works
     20 Swap A%,HPos                        does not work
     30 Temp% = A%: A% = HPos: HPos = Temp%   works
```
