## Windows LaserWriter v3.0.4 Driver: Wrong ReadMe file (4/96)

Article Created: 1 April 1996

TOPIC -----

I installed the LaserWriter Driver for Windows 3.1 v.3.0.4, and the Read Me file in the Apple LaserWriter Software program group is for Windows 95.

DISCUSSION -----

The installer incorrectly installs the Laserwriter for Windows 95 readme.txt onto your system. The correct ReadMe is found on the disk and within the archive, but the installer uses a hidden ReadMe file that could not be removed.

Please refer to the ReadMe file posted on the Apple Software Updates sections or the README.TXT file contained within the posted software.
