DOS Compatibility Card: To Find Novell Client Software (10/95)

```
Article Created: 19 October 1995

TOPIC ----------------------------------------------------------

I need the Novell client software in order to set up a Ethernet-based network
configuration, in the PC environment of my Power Macintosh 6100 DOS Compatible
computer. How much does it cost, and where can I get it?

DISCUSSION -----------------------------------------------------

Novell's server software is a retail item, but the Netware client packages are
available via anonymous ftp from ftp.novell.com. The DOS/Windows client software
can be found in /pub/updates/nwos/dsclnt12/. The DOS client software consists of
5 self-extracting executable files: VLMKT1.EXE, VLMKT2.EXE, VLMKT3.EXE,
VLMKT4.EXE, and VLMKT5.EXE.
