DOS Compatibility Card Software Version 1.5 & Mac OS (6/96)

Article Created: 24 June 1996

TOPIC -----

What version of the Mac OS is recommended for use with PC Setup Version 1.5 and a DOS Compatibility card?

DISCUSSION -----

PC Setup 1.5 is supported on System 7.1.2 or System 7.5.3 (with either System 7.5 Update 2.0, or pre-installed System 7.5.3). Other versions of the Mac OS may cause unpredictable results. Note that System 7.1.2 is only supported on the Power Macintosh 6100 DOS Compatible. System 7.5.3 can be installed on any Macintosh that supports a DOS Compatibility Card.
