## LaserWriter Pro 630: Windows Driver Available Online (8/95)

Article Created: 7 February 1995

Article Review/Updated: 23 August 1995

TOPIC -----

I have a LaserWriter Pro 630 connected to my MS-Windows computer, but I cannot find the proper printer driver for it. There are four Apple LaserWriter drivers that ship with Windows, which driver should I use?

DISCUSSION -----

For the LaserWriter Pro 600 and LaserWriter Pro 630, you can either use the LaserWriter IINTX driver that ships with Windows, or you can download the LaserWriter Pro printer drivers from online services. If you use the LaserWriter IINTX driver, you will not be able to specify paper and tray options. The LaserWriter Pro 600/630 printer drivers are available from Online services which Apple publishes software updates on.

If you are printing from MS-DOS applications, usually you will use the generic PostScript printer driver. Apple does not provide drivers for specific MS-DOS applications.
