PC Compatibility Card: MS Office Pro 95 CD (7/96)

Article Created: 9 July 1996

TOPIC -----

When I insert the Microsoft Office 95 Professional Edition CD-ROM in the CD-ROM drive, I get an error that says, "The disk <volume name> cannot be used, because it cannot be found." However, other CD-ROMs can be read fine, including the Microsoft Office 95 Standard Edition. What's wrong?

DISCUSSION -----

This CD-ROM disc cannot be mounted on the Macintosh desktop. It is not designed for use in the Macintosh environment. However, if you have a PC Compatibility Card, this CD-ROM is readable in the PC environment. You will have to switch to the PC environment to use this CD-ROM disc.
