PC Compatibility Card: Cannot Share Memory with Mac OS (1/97)

Article Created: 27 January 1997

TOPIC ---

Can I share memory on the PC Compatibility Card with the Mac OS, or do I need to
add memory to both the PC Compatibility Card and Mac OS computer?

DISCUSSION ---

Unlike the DOS Compatibility Cards, you cannot share memory with the Mac OS on
the PC Compatibility Cards. You must add memory to both the PC Compatibility
Card and the Mac OS computer.
