DOS Compatibility Card for Pwr Mac: No Windows NT Support (8/95)

Article Created: 13 December 1994

Article Reviewed/Updated: 05 May 1995

TOPIC -----

Is it possible to set up a Windows NT file system from the DOS Compatibility Card for the Power Macintosh?

DISCUSSION -----

Any operating system that accesses hardware directly fails on the DOS Compatibility Card. Windows NT, Windows for Workgroups 3.11, OS/2, and OS/2 Warp fall into this category. OS/2, OS/2 Warp, and Windows NT will not run on the DOS Compatibility Card.

However Windows for Workgroups 3.11 will run in a limited fashion on the DOS Compatibility Card. You can use any function of this application that does not require direct hardware access (The Tech Info Library Article "DOS Compatibility Card: Using Windows for Workgroups 3.11" Provides installation instructions).

Article Change History:

09 Aug 1995 - Updated information for accuracy.

25 May 1995 - Revised 3.11 information.

26 Jan 1995 - Added Windows for Workgroups and OS/2.
