## DOS Compatibility Card: Apple Adjustable Keyboard Works (2/95)

Article Created: 11 January 1995

Article Reviewed/Updated: 22 February 1995

TOPIC -----

There is an error on page 61 of the "DOS Compatibility Card for the Power Macintosh User's Guide".

DISCUSSION -----

On page 61 the manual reads "Using the Apple Adjustable Keyboard: If you are using the Apple Adjustable Keyboard, you cannot use key combinations made up of keys from the main keyboard and function keys (for example, Shift-F1)".

This is incorrect; the Apple Adjustable keyboard works properly with a DOS Compatibility Card.
