DOS Compatibility Card: Do Not Restart While Copying (2/95)

Article Created: 11 January 1995
Article Reviewed/Updated: 22 February 1995

TOPIC ---

Is there a way to prevent the DOS Compatibility Card from restarting before it
is finished copying a file?

DISCUSSION --

There are no safety checks in MS-DOS to prevent you from restarting MS-DOS while
a copy is in progress. Since the Macintosh OS cannot determine if files are open
in the DOS container, there is no way to prevent this.

The only way to prevent zero length or corrupted files is not to press the
Control-Alt(Option)-Del keys when the computer is copying files.
