Pwr Mac DOS Compatibility Card: NetBeui Not Supported (8/95)

Article Created: 22 February 1995

Article Reviewed/Updated: 10 August 1995

TOPIC -----

I have a DOS Compatibility Card for the Power Macintosh 6100 connected to a network. When I have NetBeui only selected in Windows for Workgroups 3.11 as the communications protocol, the DOS Compatibility Card cannot communicate with other NetBeui only based Windows for Workgroups 3.11 workstations.

DISCUSSION -----

The MACODI MLID does not support NetBeui. As stated in the User's Manual, The Power Macintosh DOS Compatibility Card only supports IPX and IP protocols.
