DOS Compatibility Card: Lantastic Not Supported (5/95)

Article Created: 10 May 1995

TOPIC -----

I am trying to get Lantastic to work on the DOS Compatibility Card for the Power Macintosh. However, when I try to get it to connect on the network, it cannot see any other MS-DOS computers. I connected the DOS Compatibility Card to a Novell network, and everything worked properly. How can I get the DOS Compatibility Card to work with Lantastic?

DISCUSSION -----

Lantastic has not been tested, nor is it supported on the Power Macintosh 6100 DOS Compatible or DOS Compatibility Card. While it may be possible to get it to work, Apple does not have any information on how to do so. You should contact Artisoft and work with them on finding a solution. Since Lantastic is an unsupported software package on the DOS Compatibility Card, Apple cannot provide you with any additional support.
