SoftWindows: Does Not Recognize PC Cards on PowerBooks (10/95)

Article Created: 3 October 1995

TOPIC -----

I am running SoftWindows on my new PowerBook 5300. Will the SoftWindows emulation software communicate through my PC Card Modem or PC Card Ethernet?

DISCUSSION -----

Insignia's SoftWindows product currently does not recognize PC Cards when used on the PowerBook 5300 series. As a result, SoftWindows users will not be able to communicate via a PC Card modem or PC Card Ethernet. The reason for this is that SoftWindows communicates directly to the hardware and does not look for PC Cards that may be inserted into a PowerBook 5300.

Insignia is aware of the problem and is working on a solution.
