## Connecting Mac OS to Windows For Workgroups (5/95)

Article Created: 19 May 1995

TOPIC -----

I have a network with DOS/Windows computers running Windows for Workgroups. I want to hook up my Macintosh to share the resources available on the network, how do I do it?

DISCUSSION -----

Windows for Workgroups uses the NetBEUI protocol. There currently is no software available for a Macintosh to utilize the NetBEUI protocol.
