LaserWriter 16/600 PS Fax: Windows 95 Compatibility (6/96)

Article Created: 6 December 1995
Article Reviewed/Updated: 26 June 1996

TOPIC ---

I am trying to send a fax with my LaserWriter 16/600 PS fax printer using
Microsoft Windows 95. The Windows driver I downloaded from online services does
not work. Is the driver compatible with the printers fax feature?

DISCUSSION --

Apple does not provide a PostScript fax compatible driver for Microsoft Windows
95. There may be some third-party options available, but we do not know of any.
In order to use the fax capabilities of the LaserWriter 16/600 PS printer, you
must use a PC-compatible running Windows 3.1 upon which to install the Windows
PS Fax software, or a Macintosh computer and the LaserWriter 8.2.3f driver.
