PC Setup 1.0.7: Untested with System 7.5.3 (6/96)

Article Created: 7 May 1996

Article Reviewed/Updated: 11 June 1996

TOPIC -----

The CD version of System 7.5 Update 2.0 contains a separate installer for DOS Compatibility Card software version 1.0.7. Will this work with System 7.5.3?

DISCUSSION -----

Although the installer for the DOS Compatibility Card software v1.0.7 is included on the CD, this software is not supported for use with System 7.5.3.

DOS Compatibility Software Update 1.5 is now available from the online services and the Apple Order Center. Apple recommends using this version with Apple DOS Compatibility cards, except for those used in Macintosh Quadra and Centris 610 computers.

The Tech Info Library article titled "Locating Vendor Information" can help you search for the Apple Order Center's phone number.

These articles can help you locate the software update mentioned here:

- "Where To Find Apple Software Updates" - Lists online services for free Apple software updates.
- "Obtaining Apple Product Support in the USA" - Lists 800 numbers and online services for software updates, Apple support information, and a subset of the Apple Tech Info Library.
