TOPIC -----

Can I use AppleTalk Remote Access with Token Ring?

DISCUSSION -----

Yes. The TokenTalk installer that ships with the Token Ring 4/16 NB Card will include AppleTalk version 57, which is required for AppleTalk Remote Access.

NOTE: The AppleTalk Remote Access READ ME file states that "Answering calls on a Token Ring network is not supported as of TokenTalk version 2.2..." The new TokenTalk driver for the Token Ring 4/16 NB card utilizes AppleTalk version 57, which is required for AppleTalk Remote Access. So, AppleTalk Remote Access is now fully functional on a Token Ring network.
