AppleTalk Remote Access: Answers Only One Call at a Time

Article Created: 5 November 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

Can several people call into AppleTalk Remote Access simultaneously?

DISCUSSION -----

Because AppleTalk Remote Access was designed as a personal networking service geared toward the individual, it can answer only one call at a time. In addition, Apple wanted the product to be both affordable and easy to set up. Allowing more than one line would increase its complexity and cost.
