## AppleTalk Remote Access: Writing Modem Scripts 11/94

Article Created: 5 November 1991

Article Reviewed/Updated: 28 November 1994

TOPIC -----

Is there any documentation available to help write modem scripts for AppleTalk Remote Access (ARA)?

DISCUSSION -----

Those interested in writing their own scripts can order the "AppleTalk Remote Access Modem Toolkit" (part number R0129LL/A) from APDA, Apple's source for developers' tools. This kit provides all the tools and information necessary to build an AppleTalk Remote Access modem script.

Apple Remote Access MultiPort Server comes with the Modem WorkShop. It includes instructions for writing scripts and descriptions of all the CCL commands. It is intended for experienced programmers with a good understanding of telecommunications and modem operations.

Article Change History:

28 Nov 1994 - Added information about MultiPort Server script authoring.
