AppleTalk Remote Access: Modem Speed Requirements (11/94)

Article Created: 5 November 1991
Article Reviewed/Updated: 28 November 1994

TOPIC ---

Can I use any speed modem with AppleTalk Remote Access (ARA) v 1.0 or Apple
Remote Access 2.0?

DISCUSSION --

Any modem with a data rate of 2400 bps or higher can work with either. Most
importantly, you need the appropriate modem script for your modem. Apple
recommends 9600 bps or higher for best performance. Contact your modem vendor
for the latest modem script.
