ARA 2.0: Incompatible with Macintosh Plus (5/96)

Article Created: 11 February 1994
Article Reviewed/Updated: 24 May 1996

TOPIC ---

I'm using a Macintosh Plus, Hayes V-series 9600, AppleTalk Remote Access (ARA)
2.0 and supplied script. ARA won't dial. AppleTalk Remote Access 1.0 worked on
this Macintosh Plus.

DISCUSSION ---

ARA 2.0 is incompatible with Macintosh Plus computers. Version 2.0.1 is
compatible, and can be ordered through the Apple Order Center. There is a small
charge for shipping and handling. The Tech Info Library article titled "Locating
Vendor Information" can help you search for Apple Order Center's phone number.

Article Change History:
24 May 1996 - Updated for technical accuracy.
25 May 1994 - Added 2.0.1 availability information.
11 Apr 1994 - Added the note about ARA 2.0.1 beta software.
