MNP 10 and ARA 2.0: Description (3/94)

Article Created: 4 March 1994

TOPIC ---

Information regarding the use of MNP 10 error correction.

DISCUSSION --

MNP 10 is an error-correction protocol that allows for more reliable data
connections using cellular modems.

To establish an MNP 10 connection, your modem and the modem you're calling must
support MNP 10, and you must select the "Use MNP 10 error correction in modem"
checkbox in the Remote Access Setup window.

If both modems do not support MNP 10 error correction, the selection in the
Setup window will do nothing.
