AppleShare 4.0 & ARA MultiPort Server Not Compatible (5/94)

Article Created: 6 May 1994

TOPIC --

This article describes an incompatibility between AppleShare 4.0 and Apple
Remote Access (ARA) 2.0 MultiPort Server.

DISCUSSION ---

AppleShare 4.0 is not compatible with ARA MultiPort Server. AppleShare 4.0 is
compatible with the ARA Personal Server and ARA Client products.

AppleShare 4.0 and ARA MultiPort Server both use the Apple Shared Library
Manager (ASLM). However, AppleShare 4.0 uses version 1.0 and ARA MultiPort
Server uses version 1.1. Because ASLM 1.1 is not backward compatible with ASLM
1.0, AppleShare 4.0 and ARA MultiPort Server cannot run on the same server.

ARA Personal Server and ARA Client do not use ASLM, so they are compatible with
AppleShare 4.0.

This incompatibility has been fixed with the release of AppleShare 4.0.1 and
greater, an upgrade of AppleShare is recommended.
