ARA MultiPort Server 2.1 & 2.0 Differences (1/96)

Article Created: 13 October 1995
Article Reviewed/Updated: 26 January 1996

TOPIC ---

How does Apple Remote Access (ARA) MultiPort Server 2.1 differ from 2.0, and how
will ARA MultiPort Server 2.1 affect 2.0 clients?

DISCUSSION --

Here are the differences:

• Software includes bug fixes for improved server stability
• New short NuBus serial card fits all Macintosh NuBus systems
• Lower price
• No longer supports X.25 connections

The ARA MultiPort Server 2.1 lets ARA 2.0 and 1.0 clients connect. Users will
notice no difference when connecting.
