Apple Remote Access and Meeting Maker 3.5 (6/96)

Article Created: 26 June 1996

TOPIC -----

I'm experiencing a problem with Apple Remote Access (ARA) 2.0.1. My connection works fine until the point I try to disconnect. ARA never hangs up the modem connection and then the system locks.

DISCUSSION -----

Meeting Maker XP 3.5 seems to have compatibility problems with Apple Remote Access 2.0.1.

ON Technology the vendor of Meeting Maker is aware of the problems with Meeting Maker 3.5 and ARA. They have addressed this issue in version 3.5.1.
