AppleShare Server: Drawbacks to Backing Up via Drag-Copy

Article Created: 15 April 1991

TOPIC -----

Instead of using a backup utility, why not just drag-copy my AppleShare file server files onto another hard disk?

DISCUSSION -----

If you drag-copy AppleShare files from one hard drive to another, you'll lose all your access privileges. Use the AppleShare Administration disk and do a Copy Volume from the menu. Other ways are to use DiskFit from SuperMac, HFS Backup 3.0 from PCPC, or Retrospect 1.1 from Dantz Development Corp. All four of these products retain the AppleShare access privileges.

For more information, search on the above company names.
