## AppleShare File Server: Cannot Be Bypassed at Startup

This article last reviewed: 18 February 1991

TOPIC -----

Is there any way to prevent an AppleShare file server from starting up AppleShare that doesn't require using a separate system disk? Is there an option key sequence, for instance?

DISCUSSION -----

There is no hot key you can use to bypass AppleShare at startup. Using a separate system disk is the only way to prevent AppleShare from loading. Copyright 1991, Apple Computer, Inc.
