AppleShare Print Server: Using with Linotronic Printers

This article last reviewed: 25 February 1991

TOPIC -----

Is it possible to use the AppleShare Print Server on a mixed network of printers, including Linotronic 1300s, Linotronic 100s, and LaserWriters?

DISCUSSION -----

There should be no problem with the LaserWriters, but the AppleShare Print Server doesn't support any of the Linotronic imagesetters, including spooling.

Check with Linotronic to see if they can recommend a spooler for you.

For more information, search on "Linotronic".
