Article Last Updated:

TOPIC -----

What is the maximum number of connected users allowed by AppleShare 3.0?

DISCUSSION -----

Version 3.0 of AppleShare increased the maximum number of connected users from 50 to 120. The default setting is 50. The practical upper limit for connected users is probably less than 120 for reasonable response time. Also, the Hierarchical File System (HFS) limits the number of open files to 346.
