AppleShare: Switch Launching Over 3Com Networks

Article Created: 28 October 1992

TOPIC ---

I've heard that Switch Launching can be done over the network if I
have a 3Com card installed in my Macintosh. Is this true?

DISCUSSION --

"Switch Launching" is available over LocalTalk or Ethernet for the
indicated versions:

• 3Com's System 6.0.X Apple Workstation Software and
    • 3+Share File Server (1.2.1 through 1.6.1) - Supported
    • 3+Open File Server (All versions) - Supported
    • AppleShare File Server (All versions) - NOT Supported

• 3Com's System 7.0.X Apple Workstation Software and
    • 3+Share File Server (All versions) - NOT Supported
    • 3+Open File Server (All versions) - NOT Supported
    • AppleShare File Server (All versions) - NOT Supported

(This is noted on a small piece of paper provided with the 3+Open
Administrator software and update guide or it will be relayed
by a 3Com Support Technician if you call 3Com for support.)
