AppleShare 3.0: Workstation Software Disk Space

Article Created: 28 October 1992

TOPIC -----

How much room does Workstation 3.0 software take compared to Workstation software 2.0 with regard to disk space? This is important because I use Macintosh Plus computers with 800K floppy disks, and every bit of space is important.

DISCUSSION -----

We tested three versions of AppleShare, configured on an 800K floppy disk with System 6.0.7 minimal install of software for any Macintosh:

System Folder size is 599K:

- AppleShare 2.0.1 - 45K
- AppleShare 2.0.2 - 44K
- AppleShare 3.0 - 74K

Based on these figures, AppleShare 3.0 workstation software occupies about 30K more than versions of 2.0 workstation software.
