AppleShare Pro: Installing The Software (6/93)

Article Created: 11 June 1993

TOPIC ---

What is involved in setting up the 230MB internal hard drive as an A/UX
server? How is AppleShare Pro installed, or is this software and the
operating system already installed?

DISCUSSION ---

The A/UX Operating System will be preinstalled on the Hard Disk. The
AppleShare Pro software will need to be installed via the regular
installer. A/UX must be running before the installation of AppleShare Pro.
