AppleShare Pro: Admin Similarities to Prior Versions (6/93)

Article Created: 11 June 1993

TOPIC -----

Is the basic administration of AppleShare Pro similar to AppleShare version 3.0.x?

DISCUSSION -----

The basic administration for the server is the same. There are changes with respect to the fact that the root "/" volume can't be shared. Also, you can't share a folder that contains a UNIX mount point, you must share the folder that is the mount point. The Users, Groups and Privileges administration windows will look the same as in previous versions of AppleShare.
