AppleShare Pro: Number Of Users and Groups (8/95)

Article Created: 24 August 1993
Article Reviewed/Updated: 23 August 1995

TOPIC ---

It is stated that AppleShare Pro can support a maximum of 200 simultaneous
users. Is there a limit as to how many user ACCOUNTS can be defined under
AppleShare Pro?

DISCUSSION --

On page 115 of the "AppleShare Pro Administrator's Guide" you will find the
AppleShare Pro Specifications appendix.

Here is the contents of that page regarding the AppleShare Pro File Server:

Begin_Table

Maximum connected users	200	
Maximum number of open files	5,000	(may require adding RAM)
Maximum number of volumes	50	
Maximum number of shared items	50	
Maximum number of users in a user/group file	2,000	(Recommended)
Maximum number of groups in a user/group file	2,000	(Recommended)
Maximum number of group memberships per user	42	
Maximum number of simultaneous launches	200	

End_Table

NOTE: The maximum number of users in a user/group file and maximum number of
groups in a user/group file in the manual is stated at 2,000. However,
AppleShare Pro is based on AppleShare 4.0 code and the maximum number of users
in a user/group file and maximum number of groups in a user/group file in the
"AppleShare Administrator's Guide, Version 4" is stated as 8,192 (2,000
recommended).
