AppleShare 4.0.1: Cannot find the file: IWEm (5/94)

Article Created: 19 May 1994

TOPIC --

There have been multiple reports of people that are having trouble installing
AppleShare 4.0.1. The error they get during installation is "Cannot find the
file: IWEm."

DISCUSSION ---

This is a file used by the AppleShare Print Server. You need to get the
original AppleShare install disk and copy the file called "IWEm" from the
AppleShare Print Server folder into the System Folder on the server's hard
drive. The 4.0.1 upgrade will run correctly once this file is in place.
