AppleShare 3.0.1 and System Error -35 (4/95)

Article Created: 19 April 1995

TOPIC -----

We are using AppleShare 3.0.1 with System 7.0.1 on a Macintosh SE/30 with an 80 MB hard drive. When attempting to view access privileges in AppleShare Admin, I get the following message:

"The Access privileges on this volume have been lost. AppleShare will attempt to recreate them. System error -35."

We tried deleting the AppleShare PDS file but continue to get the same error.

DISCUSSION -----

The Error -35, "no such volume" may come from problems in the volume information block, and could indicate other problems with the directory structure of the hard drive.

Use a disk utility, like Disk First Aid or a third-party utility, to correct the problem. If that fails, reformat the drive.

WARNING: Be sure to backup your data before reformatting the drive. The format process will erase all data from your hard disk.
